SWISS LIGHT CREATIONS

PLANK

Tulux – a company
that inspires.

SWISS LIGHT CREATIONS

“Reliability and quality. This is what SWISS LIGHT CREATIONS stands for – and has done since 1948. We invest a great deal in these values – right here in Switzerland, at our production site in Tuggen in the canton of Schwyz. 200 members of staff ensure that genuine Swiss quality is reflected in every stage of the production process. From the idea through to the development, planning and successful implementation, we create lighting solutions that trigger emotions, because they are high quality and because they are truly SWISS LIGHT CREATIONS.

Decades of company tradition commit us to constant innovation. This requires courage, clarity and responsibility: the courage to create new solutions, clarity in implementation, and a responsibility to our staff and to society. That's why we live up to our responsibilities as a manufacturer and play an active role in recycling; after all, lights and lighting should not only be produced in high quality, they should also be able to be returned and recycled properly throughout Switzerland. As an SME, we are a significant player in the market. This is a position that comes with obligations. We take responsibility for our entire industry and bring new meaning to the word quality.

We design light, giving it form and an individual radiance. Rather than an arbitrary set of products, SWISS LIGHT CREATIONS stands for precise, convincing solutions. Our developers create not only high-quality standard luminaires but also special luminaires according to customer requests. Our development focuses on lights and lighting systems for the Swiss market. And, judging from the market's appreciation for what we do, we feel that our claims are justified and that we deliver precisely what we represent: SWISS LIGHT CREATIONS.”

A handwritten signature in black ink, which appears to read 'Ivo Huber'. The signature is written in a cursive, flowing style.

- 12 Light output
- 13 Applications

PLANK – five convincing reasons.

1. Ready to light
2. IP protection with chrome-steel-plated sealing
3. Robust, simple and functional
4. Exceptionally easy installation and servicing
5. Wide range of applications

PLANK – an idea
that became reality.

SALES OFFICE

“When technical expertise, creativity and experience come together in a new development, the result is perfect. PLANK, the new commercial and industrial luminaire, makes protracted installation times a thing of the past.

The PLANK click adapter is easy to mount using a nail gun. It takes just a few steps to finish installing the luminaire by hand, as it can be easily clicked into place with no need for tools. The ease of service is another advantage: the luminaire can be replaced without disabling the electric power.

PLANK is a luminaire that is suitable for everyday use in virtually any area of application. For me, PLANK is the modern realisation of a commercial and industrial luminaire. It's robust, reliable and functional – a strong luminaire for tough environments.”
