

IMPRESSIVE RANGE OF LUMINAIRES

“HAUS 39”, ST. GALLEN | PUBLIC BUILDING

The design of the unusual outdoor luminaires belonging to the new “Haus 39” building in St. Gallen reflects the style of the laundry next door. Forma Architekten from St. Gallen put their heart and soul into the realisation of their concept in collaboration with Tulux AG from Tuggen.

The new “Haus 39” building opened in early 2018. The entire shell and the interior design was planned by Forma. After more than seven years of planning by the architects and around 30 months of construction, the new building in Rorschacherstrasse 226 offers a library, a cafeteria, an auditorium and a medical training centre. The upper floors also house a crèche, a training room and office space. At the request of the two building owners, Emil Wild AG and Kantonsspital St. Gallen, various hospital departments are dedicated to the topic of “learning” in “Haus 39.”

IMPRESSIVE RANGE OF LUMINAIRES

“HAUS 39”, ST. GALLEN | PUBLIC BUILDING

Forma Architekten was looking for a manufacturer for the luminaires, and Tulux impressed with the countless luminaires in its standard range plus the offer of custom luminaires produced in Switzerland. The chosen lighting design focuses on the two custom luminaires in the indoor and outdoor areas and the new products LEAN AND EQUIP. Indoors, the eye is drawn to the 230 large, cube-shaped acrylic diffuser luminaires. The offset positioning of these custom luminaires mean they not only ensure optimal lighting conditions, but are also an attractive design feature. Together with the interior design, the lighting thus creates the desired warm atmosphere. Patrick Eberhard, qualified architect (UAS), is delighted with the constructive collaboration with Tulux:

“Tulux was constantly available and always delivered target-oriented, solution-focussed results that met our requirements.”

A fresh approach to exterior lighting

It was particularly important to the architects that the courtyard between the new building and the laundry next door be enlivened from various angles. The architects wanted a luminaire that resembled a “laundry bag”, to visually reflect the neighbouring laundry. Lighting solutions for outdoor areas can be challenging, and Forma Architekten also put its trust in Tulux for this shared project. Forma and Tulux sketched an initial design based on a real laundry bag. Using this sketch, Tulux then swiftly created a prototype for the custom luminaire and made the architects’ vision a reality. The eight custom luminaires are each two metres long with a diameter of one metre. Michael Bösch, member of the management team, is delighted with the result:

“The way they immediately understood our vision, their help with the preliminary sketches and the fast, high-quality implementation showed Tulux to be a highly competent and reliable partner for lighting solutions.”

Patrick Eberhard was able to rely on Tulux at all times.

Michael Bösch knows how precise the work needs to be to produce an inspiring end product.

Tulux custom luminaires

Tulux helps its customers to create visualisations of the lighting effect, lighting properties and shape. With a wealth of knowledge and experience stretching back to 1948, Tulux analyses the surroundings and incorporates them into the implementation options. Together, a concept is drawn up that takes account of the stated requirements and compliance with the applicable regulations. Based on this concept, specifications for the construction are drawn up and a simulation used to make initial prognoses. After all, good solutions are always a synergy between design and construction. Based on the construction plans, Tulux makes tools, bends metals, moulds plastics and refines surfaces to create uncompromising and professional unique solutions. In the Tulux measuring laboratory, properties are tested, resistances are identified and weak points are uncovered at an early stage. These are then analysed and the causes rectified. Lastly, an assessment is made of the quality.

In Tulux, customers have a competent partner that accompanies and supports them and their vision from the idea generation to the finished installation. As Tulux develops and manufactures everything under one roof, the products' functionality is guaranteed. The entire Tulux team works to ensure that the project shines and inspires all who behold it.
